LETTER FROM THE MAYOR

To the good citizens of Eureka,

As we head on into 2024, I am excited for the future of our community and where the town is headed in respect to services, economic gains, business and growth.

In this letter there will be some points of goodness, and a few thoughts of where we are going to be making some changes in the near future.

I would first like to thank the good men who are involved in the City Council and the efforts, energies and leadership they provide for the community. Their dedication is truly a work of love for the community, they bring to the table a massive amount business acumen, experience and devotion. We are lucky to have each and everyone of them helping further the cause.

I would also like to thank the city employees for their service and work ethics. The city employees have been engaged in improvements externally and internally. There is a lot going on behind the scenes which is never acknowledged. I salute them for their individual efforts and dedication.

Members of our volunteer committees, thank you very, very much for your hard work, dedication and efforts. From the fireworks to the gingerbread houses, and everything in-between, those of you who are involved.... I and those with silent voices are humbly grateful.

Another group of individuals which deserve a pat on the back are the members of our community which are involved in the emergency services. Your work is truly an effort and expression of compassion and love for mankind. Every time I hear a siren or see smoke my heart drops a-little for the safety and health of those in our community which are involved with these services. Thank each and every one of you for your efforts.

Just for clarification, and reminder; the city is a business which is owned by the citizens whose management is elected. As citizens we can't afford or allow critical infrastructure to fail. There are costs and penalties involved in poor management. As a very small town, we can't allow or afford delinquency, the recovery costs come with a very steep price.

Listed below are four items which are in the forefront of discussion to improve the city's position in the future.

- Culinary water system. As you are all aware, we have air in our water. This "annoyance" (it's not dangerous) was the result of an improvement on the main service line, from the wells on the west side of town. This was the first step in resolving a missed engineering problem. It will be a few more months before the "air" problem will be resolved
- Stray dogs and cats. This continues to be a problem. We are (still) working on enforcement. As citizens, you have every right to individually protect yourselves and property.
- Main Street. Highway 6 is our cash artery to help our town improve its financial position. All of our business and landmarks are critical for our cash flow. Tourism is the target. (Sorry mining is not; those days are over) Our main street and its history (and its historic buildings) are the cash cow and pride of the community. For example, efforts like those of Doug Wright have devoted a ton of effort to improve main street. The new RV park behind Bs and the attractions like the bike museum, Porter's cabin, the caboos and the Levi mural are all points of interest which attract tourism. Then to top those attractions with items like the new war memorial banners the Halloween festival and all the tour groups which frequent our main street, all of these (and those not listed) are awesome! From the City side, there will be efforts to improve this asset in the near

future. We need every truck, car, side by sides and RVs to stop and spend a little time on main street

- Water and sewer fees. Because of inflation and the maintenance expenses needed to keep our systems repaired and improved, (to not rely perpetually on grants to keep our systems funded) in the near future there will be an adjustment to our city utility bill. I will state this very clearly and boldly WE DON'T MAKE PROFIT ON WATER AND SEWER! It's a break-even service. Because the city has very little supplemental income, we need to pay for the services through our billing. There will be much dialogue BEFORE the prices go into effect.

John F. Kennedy quoted this in 1961 "And so, my fellow Americans: ask not what your country can do for you--ask what you can do for your country."

I am going to modify his quote slightly. And so, my fellow Citizens of Eureka ask not what your town can do for you, but what you can do for your town.

Truly we can all take small efforts (I am included) to pick up a piece of trash, clean our yards, slow the negative rhetoric, be kind to our neighbors, drive slowly down the streets, keep dogs from barking incessantly, get building permits, keep the noise down after 11:00PM, volunteer and remove entitlement from our beings. Individually we communally make will make a difference.

May God bless you and your families and may God bless Eureka!

Mayor Dever
